

Visual binding + minimum repair | actual development construction

Match the reference, bind its current graph ID, then return every minimum restoration set.

Match reference geometry; read its current candidate ID.

Source context (not input)

14 vertices / 16 edges
7 unavailable vertices
Budget: 4

Structural input

Fixed terminals: V1470, V5885
Unavailable: V5246, V7372, V6716, V2353, V3892, V7052, V4504

Edges: V9801-V8726; V3892-V5885; V9801-V3673; V6716-V7052; V4504-V2353; V6716-V5246; V7052-V3892; V6716-V1470; V6716-V7372; V4504-V2647; V9801-V2353; V6716-V9308; V5246-V3892; V4504-V7372; V6716-V2647; V4504-V8726

GT: terminal V9801; minimum cost 4; budget sufficient: true.

All optimal sets: {V3892, V4504, V5246, V6716} OR {V3892, V4504, V6716, V7052}
Component sizes for each optimum: [11]
